Abatement Technologies Aids in Rapid Response for Paul Davis Halifax

The emergency cleanup and restoration company utilizes Abatement's one-stop-shop business model to access reliable indoor air quality solutions at a moment's notice

Georgia, Atlanta—May 15, 2024—[Abatement Technologies](#), a manufacturer of specialized construction containment products designed to help protect those in and around construction in occupied spaces, is enabling emergency preparedness for Paul Davis Halifax, a franchise location that provides emergency cleanup and restoration services to residential and commercial properties across North America. Leveraging Abatement Technologies' indoor air quality solutions, Paul Davis is able to provide immediate, 24-hour emergency response to the Nova Scotia community. This success story is detailed in a new case study, "Expecting the Unexpected: How Abatement Technologies Aids Paul Davis Halifax's Rapid Response in Nova Scotia."

While it's impossible to predict or prevent natural disasters, emergency preparation helps Paul Davis Halifax rapidly respond to the aftermath and prevent further structural damage. To enable these rapid response times, Paul Davis Halifax works with solutions providers that guarantee customer service, fast turnarounds, and expedited deliveries. Since 2016, Paul Davis Halifax has trusted Abatement Technologies as a reliable, one-stop shop for air quality equipment and consumables.

Jayne Shannon, President, Paul Davis Halifax, said "Abatement Technologies is always there for us—weekends, after hours, really whenever we need support. The team understands our business model and when we're expecting a severe weather event, Abatement is already anticipating our needs. This proactive relationship has made the biggest difference for us."

In 2023, Abatement Technologies assisted Paul Davis Halifax in providing rapid response and remediation equipment after a series of floods and wildfires left the province of Nova Scotia in a state of emergency. While disaster restoration equipment and PPE can become scarce during times of crisis, Abatement Technologies ensures that Paul Davis Halifax has an inventory of essential solutions. This includes:

- Dehumidifiers
- Portable air scrubbers
- Air movers
- HEPA filtration

- Gloves
- Respirators

“As first responders, Paul Davis is on the front line. And, in times of true disaster, having a skilled team and network of partners is essential in being able to provide this type of critical service. We’re grateful that we can rely on Abatement Technologies to have our back any time, any where,” Shannon added.
