MEDIA ALERT

Abatement Technologies to Present Construction Containment Wall Rentals at The Buildings Show in Toronto

FORT ERIE, Ontario – Nov. 21, 2023 – [Abatement Technologies](#), a manufacturer of specialized construction containment products designed to help protect those in and around construction in occupied spaces, announces it will debut a new rental option for contractors at this year's [The Buildings Show](#), to be held from Nov. 29-Dec 1, in Toronto. At **booth #736**, Abatement Technologies and its service partner, [Temporary Wall Systems](#) (TWS), will showcase the SHIELD WALL™ solution and share best practices for either renting or buying temporary wall systems for projects, as opposed to using single-use materials.

Abatement Technologies' SHIELD WALL™ solution will be on display to demonstrate the modularity and adaptability of the temporary system. Capable of being assembled anywhere indoors without the use of specialty tools, SHIELD WALL™ is designed to minimize the disruption of a renovation project while protecting occupants from dust and debris. Reusable, lightweight, and easy to install, SHIELD WALL™ boasts a clean and professional appearance, offers unlimited configuration possibilities, and is less labour-intensive than traditional drywall methods.

Now, through TWS, Abatement is able to bring SHIELD WALL™ to the Canadian construction industry through rentals—a great option for one-off and short term projects.

During the show, Abatement Technologies *and* TWS experts will be available for interviews. Post-show interviews can also be arranged.

Details:

Who: [Abatement Technologies](#) and [TWS](#)

Where: [The Buildings Show](#)
Booth #736

When: Nov. 29-Dec. 1, 2023
