## **Abatement Technologies Ltd. Opens New Global Headquarters in Fort Erie**

*The state-of-the-art facility will consolidate operations and support innovative manufacturing processes to drive future growth*

**FORT ERIE, Ontario – July 6, 2023** – [Abatement Technologies](#), a manufacturer of specialized construction containment products designed to help protect those in and around construction in occupied spaces, announces the opening of its new global headquarters in Fort Erie, Ontario. The multi-purpose, 100,000-square-foot facility is now home to the company's manufacturing and warehousing operations, as well as its research and administrative departments. Within this state-of-the-art facility, Abatement Technologies will leverage innovative manufacturing and production processes to support the company's long-term growth plans.

Located at 1481 Harber Court, the new headquarters gives Abatement Technologies the bandwidth to increase its competitiveness on a global scale by driving efficiencies and bringing processes that were once spread across multiple sites under one roof. The company currently has 170 employees across North America, with 100 of them located in the Fort Erie area.

“Over the past 24 months, we have been working diligently to build a world-class facility that will serve as our new headquarters and house our production and administrative teams. We’re pleased to announce that we have officially made this new facility our home,” said Andrew Harber, CEO, Abatement Technologies. “Fort Erie has been home to the Abatement name since 1985, and we’re excited to continue to build our brand in a community we love.”

Celebrating 77 years of business in Fort Erie, the Harber family has been a staple in the community since 1946 when Harber Manufacturing was founded by Blair Harber Sr. The company transitioned into Abatement Technologies in 1985 and carries that same name in its third generation of family ownership and operation.

“Abatement Technologies was founded on the skilled labor and support from the Fort Erie community,” Andrew Harber said. “Now, 38 years later, we are still leveraging local talent and creating new opportunities for our community members. As we continue to expand, we will need to fill roles in various departments, including manufacturing, IT, marketing, research, finance, and overall operations. We have ambitious growth plans and are committed to achieving them right here in Fort Erie.”

Abatement Technologies' new headquarters is located at:  
1481 Harber Court  
Fort Erie, Ontario  
L2A 0G3
