## **Abatement Technologies Ltd. Announces Strategic Partnership with Temporary Wall Systems**

*Abatement Technologies Ltd. will supply Temporary Wall Systems (TWS) with its SHIELD WALL Core panels to bring a modular containment rental option to industries across Canada*

**FORT ERIE, Ontario** – July 10, 2023 – [Abatement Technologies](#), a manufacturer of specialized construction containment products designed to help protect those in and around construction in occupied spaces, announces a strategic partnership with Temporary Wall Systems (TWS), the first full-service provider of rentable temporary wall containment systems for commercial renovation. By selecting Abatement Technologies as its preferred vendor for modular containment wall systems, TWS will offer a quality product and increased accessibility to time-saving, rentable construction containment.

Until recently, contractors would use drywall when they needed to block off a construction site from the surrounding environment, wasting time, materials, and money. As a leading manufacturer of containment products, Abatement provides modular containment walls that are reusable, lightweight, and easy to assemble. This partnership positions Abatement and TWS to meet the rising demand for temporary construction containment with a rentable, full-service business model for contractors and facilities managers.

For the past 20 years, Abatement Technologies has been dedicated to the construction and restoration industries, with the past six years focused on the development of superior modular containment wall systems. Through its parent company, HomeFront Brands, TWS has been well aware of Abatement Technologies' products and their reputation in the industry.

Andrew Harber, CEO, Abatement Technologies, said, "We're honored to partner with Temporary Wall Systems as its preferred provider of modular containment wall systems. This partnership stems from our confidence in the success of HomeFront Brands and its track record of launching successful franchises. With the combination of HomeFront Brands' extensive experience growing businesses and the massive market for containment walls, TWS is positioned for rapid growth, and we're excited to continue working closely with them as they provide rental options for our SHIELD WALL."

Jeff Dudan, HomeFront Brands' Chairman and CEO, added, "My business relationship with Abatement Technologies, spanning over two decades, continues to thrive because it is rooted in our shared values and an unwavering commitment to excellence. This exciting partnership allows us to combine Abatement's exceptional products with our efficient full-service rental model, resolving persistent challenges faced by contractors and facility managers across Canada. We're thrilled to embark on this transformative new chapter together."

The key product in this partnership is Abatement's SHIELD WALL Core panels, a flagship modular containment wall designed for modern real-wall appearance and sound attenuation. SHIELD WALL is easy to clean and designed to work with portable air scrubbers, making it ideal for critical care environments. Furthermore, its sound attenuating properties and attractive finish options help it perfectly hide construction in restaurants, offices, labs, and everything in between.

TWS technicians are trained in customized installation for a variety of specialized environments, including infection control for healthcare and dust-free solutions that allow businesses to remain open during construction.
