

AXIAL AIR MOVER

Restoration Equipment

RAM4000

RAM4000

The RAM4000 Axial Air Mover is aerodynamically designed, delivering an airflow of 2400 CFM. The high airflow helps increase the rate of water evaporation, thereby drying wet surfaces within a much faster time. Ideal for drying carpets, floors, walls, ceilings and furnishings after cleaning or flood restoration. This unit features 2 safety devices, a timer, a resettable circuit breaker and an on-board duplex GFCI receptacle. CSA tested, this Air Mover conforms to UL 507 and CSA 22.2 No. 113 standards.

FEATURES & BENEFITS

- Variable speed rotary switch
- Timer
- Can be adjusted in multiple drying directions while it is installed on the Metal Stand Kit (included)
- Onboard GFCI protects against electrical shock in damp or wet applications
- Designed to stack for easy storage
- Easy to clean, removable front grill
