

PORTABLE ANTE UP[®]

Inflatable Emergency Anteroom

HC7917

The ANTE UP[®] emergency anteroom from Abatement Technologies[®] provides users with an easier-to-use alternative to setting up "frame and shroud" anteroom modules in the corridor. ANTE UP[®] can be placed within the doorway to minimize corridor obstruction, or placed in the corridor, adjacent to the doorway. Quickly add temporary anterooms to rooms wherever infectious, surge-capacity patients are isolated.

FEATURES & BENEFITS:

- Exceptionally portable; fits in a soft carrying bag, weighing just 40 lbs
- Deploys in less than 5 minutes using the 110V inflator/deflator (included)
- Self-seals in a doorway or quick setup outside a doorway
- Fits into or adjacent to standard 80" tall, 46" to 49" wide doorways
- Expandable to fit double doors up to 100" wide
- Takes up only 10" of corridor space when mounted within the door opening
- Use with an in-room HEPA-CARE[®] system for ideal "clean to dirty" airflow, or with a portable air scrubber in the corridor
- Left/right ports fit 8" or 10" exhausts
- Fire-rated Frame Fabric:
 - CA Bulletin 117 Section C
 - NFPA 702
 - OSHA CFR 16, Part 1610

- 1 10" exhaust / intake ports for HEPA filtration device
- 2 Zippered half-C entry / exit doors (2)
- 3 Zippered pass-through opening
- 4 Clear view windows with covers on corridor and room sides
- 5 Top load clear-view file pocket
- 6 Extended floor
