

# POWER WHIP SYSTEM

EFFICIENT AND EFFECTIVE

## K3-1020

The DUCT-PRO® Power Whip System is a popular choice, providing source removal duct cleaners with an effective and economical tool for dislodging caked-on debris from inner duct surfaces. This unique tool saves time and money, and improves cleaning quality.

The DUCT-PRO® Power Whip is designed to be used in conjunction with Abatement Technologies® HEPA-AIRE® Power Vac and DUCT-PRO® AIRE SWEEP® Compressor to mechanically clean air duct systems.

### “WHIP-IT” CLEAN

The DUCT-PRO® Power Whip comes equipped with three individual 1 inch wide, strong nylon braided whips - 10”, 14”, and 18”. These whips are attached with a unique cleaning head attachment, designed to allow fast whip and brush changes.

Its design includes a strong locking pin mechanism that allows operation in both clockwise and counterclockwise directions, and eliminates loosening and detaching during the job that might occur with a threaded fitting.

### POWER DRILL OPERATED

The DUCT-PRO® Power Whip is powered by a standard 3/8” or 1/2” electric drill (not included). The drill turns a specially designed 20’ cable in either the clockwise or counterclockwise direction. This cable rotates the Power Whips for power agitation of the contaminants.

### SINGLE ACCESS CLEANING

The bi-directional design of the DUCT-PRO® Power Whip enables the operator to clean both sides of a 20’ section from a single access point. This is especially important when trying to clean both side walls and hard-to-reach corners of square or rectangular ducting.

### OPTIONAL BRUSHES

Several specially designed bristle brushes are available as optional accessories for the DUCT-PRO® Power Whip. Also designed for bi-directional operation, these brushes can be purchased individually or as a package.

Optional Brushes and Brush Sets (sold separately):

- 8”, 12”, and 18” diameter Soft Blue Brushes
- 7”/13”/7”, 11”/18”/11” diameter Step Brushes
