

DRYER VENT CLEANING SYSTEM

FOR RESIDENTIAL AND COMMERCIAL JOBS

K3-5000

Boost your profits by offering dryer vent cleaning with our **DUCT-PRO® DRYER VENT CLEANING SYSTEM**! This portable system uses tough nylon rods, powered by a standard drill (not included), to agitate and loosen vent contaminants. A HEPA vacuum (not included, HEPA kits available) then removes the debris.

Our system features two rod diameters for maximum versatility: 5/16" rods offer maximum flexibility for straight runs up to 25 feet; and 3/8" rods provide the extra torque needed for multiple 90° bends or long runs up to 75 feet.

The rods quickly snap together with sturdy metal fittings and connect to your drill using the included adapter.

Specialized tools included in the kit tackle tough clogs like lint accumulation or bird nests. The blockage remover tool can also be used to clear gutter downspouts.

COMPLETE DRYER VENT CLEANING SYSTEM

QTY	PART NO.	DESCRIPTION
1.	1	K3-5030 Carrying Case
2.	6	K3-5002 3/8" Diameter Rod, 36"
