

ANTEROOM

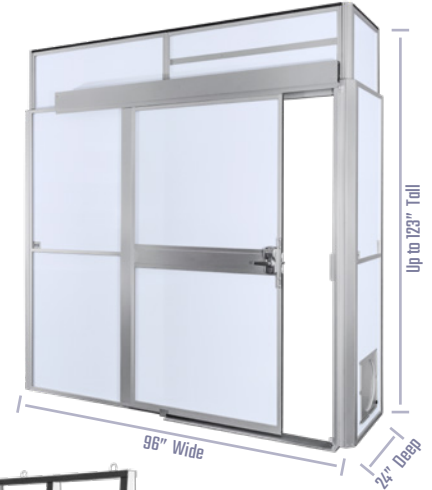

Temporary, Reusable, Adaptable Modular Containment Kit

SW-AR3H

The SW-AR3H starter package has all of the resources you need to secure construction and renovation projects in healthcare facilities. The SHIELD WALL™ by ABATEMENT TECHNOLOGIES® is a new modular temporary containment barrier system consisting of simple-to-connect panels and doors and is deployable in minutes. The system is lightweight, reusable and has a clean and professional appearance. You can quickly erect an 8'W x 2'D anteroom with these package components and then purchase additional panels, doors or accessories as and when you need them on a project by project basis. The height of every panel and door is adjustable from 7' to 10'3". Special order clear panels and mixed combinations of clear and translucent panels are available, inquire for more details.

KEY HIGHLIGHTS

- ICRA compliance up to Class 5
- Strong but lightweight aluminum and polycarbonate construction
