REMEDIATION & ASBESTOS ABATEMENT

Safety and Prevention.
Controlling Contaminants.
Breathing Easier.

ABOUT US

We are a proud Canadian company who manufactures our own Abatement Technologies branded equipment in Fort Erie, Ontario. We believe in producing equipment of the highest quality and materials made to exacting standards. Our highly knowledgeable staff is committed to supporting you with customized solutions for all of your restoration and asbestos abatement projects.

While quality equipment is of the utmost importance, we recognise that our customers need much more than just equipment to function on the job. For this reason we have added extensive lines of consumable products, safety equipment, personal protective equipment, and training to truly become a one-stop destination for all your abatement, remediation, and restoration needs.

OUR FLEET IS READY TO SERVE YOU

Keeping your equipment up-to-date and safe to use is not only important for compliance but to ensure preventable injuries don't happen. We know this is important and we are continually expanding the testing and inspection services we offer to help keep you and your crew safe, secure, and In-Spec.

Trust our professionals to make sure your equipment is up-to-date and working properly with these In-Spec services:

- Harness Inspection/Certification
- Lanyard Inspection/Certification
- Sling Adapter Inspection/Certification
- SRL/SRD Inspection/Certification
- Respiratory FIT Testing
- DOP-PAO Testing/Certification

EQUIPMENT LEASING

Contact your branch for details.

SERVICE AND REPAIR

We offer equipment repair on most major brands of dehumidifiers, air filtration units, drying fans and more.

COMPREHENSIVE TRAINING PROGRAMS

Abatement Technologies offers training courses for various industry professionals. Browse through our events listing online to find courses for healthcare construction, duct cleaning, disaster restoration and infection control. Each year, the Aire Guardian® Academy offers courses at our facilities across Canada. Our curriculum is supported by accredited trainers that provide courses for the CSA, IICRC, OH&S and more. We can also arrange training in your own facility.

IICRC (RESTORATION TRAINING)

- Water Damage Restoration Technician (WRT)
- Applied Microbial Remediation Technician (AMRT)
- Fire & Smoke Damage Restoration Technician (FSRT)
- Commercial Drying Specialist (CDS)

OTHER INDUSTRY TRAINING

- Asbestos Abatement Worker (MTCU Program 253W)
- Asbestos Abatement Supervisor (MTCU Program 253S)
- Asbestos Awareness (4 Hour)
- CSA – Infection Control During Construction, Renovation, and Maintenance of Healthcare Facilities

Course offerings may vary by branch. Please check Abatement.ca for full details. IICRC (Restoration Training) courses are all offered virtually.

COMMERCIAL DRYING EQUIPMENT

DEHUMIDIFIERS

The new AQUATRAP® RS line from Abatement Technologies® delivers the same powerful structural drying power as their predecessors and now features a stackable roto-molded plastic cabinet.

DOWNLOAD AND ACTIVATE

AVAILABLE ON **GOOGLE PLAY STORE**
AND **APPLE APP STORE**

AQUATRAP® AT150C LGR DEHUMIDIFIER

PART NO: AT150C

- Get instant, real time readings with built-in WiFi and the AT Dry App
- Units may be stacked up to two high for space saving storage
- Water removal @ AHAM (80°F / 60% RH) 85 Pints / 40L per day
- Folding handle is easily moved out of the way
- "No tools" filter changes

AQUATRAP® AT200C LGR DEHUMIDIFIER

PART NO: AT200C

- Get instant, real time readings with built-in WiFi and the AT Dry App
- Make adjustments anytime, anywhere
- Stackable for space saving storage
- Water removal @ AHAM (80°F / 60% RH) 110 Pints / 52L per day
- Folding handle is easily moved out of the way
- "No tools" filter changes

XACTIMATE - WTR-DHM>>(X-LARGE)

AQUATRAP® AT250RS LGR DEHUMIDIFIER

PART NO: AT250RS

- Water removal 90°F / 90%RH: 266 Pints / 126L per day
- Water removal @ AHAM (80°F / 70%RH): 147 Pints / 70L per day
- Rated Air Flow: 413 CFM / 700 m³/h
- Amperage: 12A max

AIR MOVERS

RAM Air Movers from Abatement Technologies® are the preferred choice of water restoration professionals.

RAM LOW PROFILE AIR MOVERS

PART NO: RAM1000LP

- 2 Speed settings: High (1,000 CFM) and Low (700 CFM)
- Can be placed in 4 drying positions
- Onboard GFCI protects against electrical shock in damp or wet applications
- Designed to stack for easy storage
- Easy-clean, removable front grill and polyethylene housing
- Conforms to UL 507 and CSA 22.2 No. 113 standards
- Hour meter
- Resettable circuit breaker
- Weighs 20.3 lbs
- Less than 2 amps on high

RAM CENTRIFUGAL AIR MOVERS

PART NO: RAM1000

- High velocity: 2,850 FPM @ high speed
- Air volume: 1,125 CFM @ high speed
- 2.2 amps (low speed) / 2.8 amps (high speed)
- Perfect weight balance: Weighs only 25 lbs
- 3 operating positions: Horizontal, 45 degrees and vertical

RAM AXIAL AIR MOVERS

PART NO: RAM4000

- Variable speed rocker switch timer
- Can be adjusted in multiple drying directions while it is installed on the metal stand kit (included).
- Onboard GFCI protects against electrical shock in wet applications
- Designed to stack for easy storage
- Easy to clean, removable front grill

DBK Drymatic®

PART NO:DBK-FGPH150

DBK DRYMATIC SIMPLE STARTER KIT

- Covers 100 sq. ft
- Boost Bar - Rotomolded lightweight Heater
- Fan to Boost Bar Connector - Prevents air loss
- 3m x 2m Floor mat - Perforations on bottom for air
- 3m x 1m Floor mat - perfect for hallways
- Qty 2: 60cm mat to mat connectors - Join the mats in any orientation
- Black Roller Bag

XACTIMATE™

DBK PRODUCT	ITEM CODE	DESCRIPTION	PRICE (USD)
BOOST BAR	WTRHTAM	Thermal Air Mover (Boost Box/Bar and Air Mover Combination)	\$200/Day
MATS (EACH)	WTRHTBL	Drying Blanket/Mat (per 24hr period) - No Monitoring	\$45/Day

HEAVY DUTY APPLIANCE MOVERS

Ideal for countless loads and powerful enough for all full-size residential appliances these models are the best choice for anyone who routinely needs to move luxury appliances 48" wide and greater.

AS-AM2400-VS	Air Sled Heavy Duty with Variable Speed up to 950 lb
AS-AM2200-VS	Air Sled Heavy Duty with Variable Speed up to 750 lbs
AS-AM2100-VS	Air Sled Heavy Duty with Variable Speed up to 450 lbs
AS-AC32SK	Air Sled Spacer Kit for Appliances on Legs
AS-AC72HS	Air Sled Double XL Hose set of 2

PATRON ELECTRIC HEATERS

Add heat for better dehumidifier performance.

PA-E15 120V Electric Heater
Ideal for residential losses, containments, wash-downs, and small spaces
5100 BTUs/HR

PA-E6 240V Electric Heater
Perfect for cold basements and mid-sized winter jobs
20500 BTUs/HR

E9 240V Electric Heater
Designed for large losses and extreme cold conditions
30700 BTUs/HR

PORTABLE HEPA VACUUMS

CANISTER STYLE WET/DRY HEPA VAC

- Exceptional wet/dry performance: 135 CFM and 92" static lift
- Portable, compact and lightweight design: 22 lbs
- Durable polyethylene cabinet
- 1.6 HP motor
- Comes with complete toolset
- 8-gallon tank capacity
- 22' power cord
- Filters:
V8042, V8042-W HEPA, 99.97% Efficiency 1/ea
V8040 - Replacement Bags 5/pk

PART NO: V8000WD

BACKPACK HEPA VAC

- Lightweight, ergonomic design to reduce fatigue
- Powerful 99 CFM airflow and 96" static lift
- Upstream HEPA filter rated 99.99% @ 0.3 microns
- Toolset included
- 50' power cord
- Filters:
V1471097500 - Dust Bag, 5/pk
V1471104500 - HEPA Filter, 1/ea

PART NO: G010

CANISTER STYLE DRY HEPA VAC

- Exceptional performance: 74 CFM and 92" static lift
- Portable, compact & lightweight design: 16.5 lbs
- Sturdy chrome-plated steel container
- True 99.97%+ efficiency HEPA filter
- Toolset included
- 4-gallon tank capacity
- 32' power cord
- Filters:
V93040 - Replacement Bags, 10/pk
V930-10 - HEPA Filter, 1/ea

PART NO: G0930

HEPA VACUUM DUSTLESSVAC® WET+DRY 16 GAL W/12' HOSE

PART NO: DT-D160G

- Fully certified and serialized HEPA Filter Vacuum
- Go between wet and dry without switching filters
- Large capacity barrel holds 40 lbs of dust
- Dimensions: 20" L x 21" W x 26" H
- Weight: 41 lbs
- Colour: Yellow/Black
- Water Lift: 103.60"
- Air Flow: 130.90 CFM
- Voltage: 120
- Amps: 10.60
- Noise Level: 79 dB
- Cord Length: 15'
- Hose Length: 12'
- Filters:
DT-13201 -HEPA filter
DT-13141 Pre-filter bags 2/pk

DECONTAMINATION SHOWERS

EASY UP™ DECONTAMINATION SHOWER

PART NO: S4000EU

The EASY UP™ S4000EU Decontamination Shower from Abatement Technologies is large enough to fit tall workers yet small and light enough for a worker to hand carry like a suitcase.

- Weighs only 41 pounds
- Compact - 30"L x 30"W x 81"H (Fully extended)
- Fast Set Up
- Easy to Transport & store
- All accessories store neatly inside (Curtains, shower head, mixing valve and collapsible corner poles)

TELESCOPING SHOWER

PART NO: S5000ET

TeleShower is easily transported to the job site and set up in minutes

- Carrying handles
- Reinforced floor is hinged for filter access and cleaning
- Collapsed dimensions: 33.375"L X 29.5"W X 50.625"H
- Door opening: 2.5"W X 72.5"H
- Corrosion-resistant marine alloy aluminum for easy decontamination
- 100 micron filter bag
- Hot and cold water controls with fixed shower head
- Drain fitting for connection to pump unit or building drain

SHOWER PUMP WITH FILTRATION

PART NO: S5300

- First stage filter for particles 25microns or larger
- Second stage filter for particles 5microns or larger
- Power requirements: 110V/60Hz
- Filtration flow of 6 gal (US)/min or 23 L/min
- Weighs 40 lbs/18kg

D-CON DECONTAMINATION SHOWER BLUE GRAYLING 77"

PART NO: S1002002

D-CON™ Decontamination Shower Blue Grayling 77"

- Eliminates the hassle and cost of constructing a temporary decontamination facility on-site
- Reduces labour costs through quick and easy set up
- Can withstand daily rigors of abatement projects without losing structural integrity
- Available in several different configurations

MONITORING and DETECTION INSTRUMENTS

SINGLE ROOM PRESSURE MONITOR

PART NO: RPM-RT1 OR
RPM-RT2

Abatement Technologies® RPM Series Differential Pressure Monitors provide 24/7 monitoring and recording of differential air pressure relationships between multiple rooms or areas within a healthcare facility.

- User-friendly, menu-driven touch screen
- Password protection feature (can be disabled)
- Visual & audible alarms with audio alarm delay & timed shutoff features
- Single or Dual Room available

DIFFERENTIAL PRESSURE MONITOR

PART NO: PPM3-S

The PPM3-S Portable Room Pressure Monitor from Abatement Technologies® is an essential tool for measuring the real-time pressure differential between two adjacent areas within a facility.

- Easy to use, color touch screen display
- Effective, Differential pressure measurement in ranges of -0.10inWC (-25 Pa) to +0.10inWC (+25 Pa)
- Archived history logs are easily downloaded in CSV format to a USB flash drive

DIFFERENTIAL PRESSURE MONITOR

PART NO: PPM4

- Built-in visual and audible alarm system with audio alarm override
- Differential pressure measurement in the ranges of -0.10inWC (-25 Pa) to +0.10inWC (+25 Pa)
- Reading accuracy of $\pm 3\%$
- Operating temperature range of 41°F (5° C) to 131° F (55° C)
- Optional wall mounting bracket (RPM-HANG) for security/theft protection
- Universal Mounting Bracket for SHIELD WALL™ (SW-HWPMUK)
- The PPM4 has an optional feature to connect to WIFI for device viewing and can be set up to notify multiple phone numbers or email addresses when in an alarm state.
- The new AT-CONNECT app is available for cellular connectivity of the PPM4 via an optional LTE Radio Expansion Module (PMA-CM).

RG BOARD

PART NO: P-RG36M

- 30" x 100' Roll
- Water resistant, lightweight & breathable
- 100% recyclable,
- Made in Canada

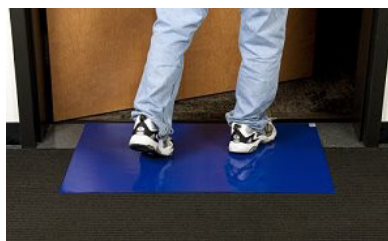

CLEAR CARPET MASK, 1 ROLL PER CASE

PART NO: P-CM340CLR

- Easy to apply and remove
- Puncture and tear resistant
- Saves clean up time and expense
- Not for use on hard surface floors
- 24" x 200" per roll

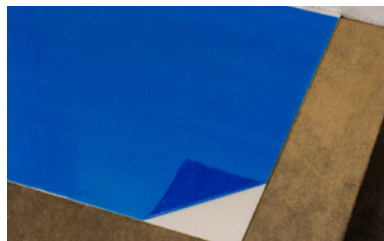

STICKY MATS

PART NO: SM2436-CTN

- Pack of 30 sheets of 24" x 36" blue polyethylene mats (sold in 10 packs)
- Pressure-sensitive adhesive on top of each mat removes contaminants from shoes and wheels
- Peel and toss away top sheet when dirty

STICKY MAT FRAME

PART NO: P-SM377

The sticky mat frame is used to hold sticky mats in place (SM2436). It also protects floors and increases functionality with its mobility so you can move them from room to room with ease.

PART NO: PH3

PART NO: PH4

Support poly sheeting from the ceiling grid with these various styles of hangers.

BUY OR RENT CONTAINMENT SOLUTIONS

SHIELD WALL™ is a modular wall system for containing airborne contaminants during construction or renovation. It creates safe zones, like patient isolation areas or clean rooms, by preventing contaminants from entering.

Used with an Abatement Technologies Differential Pressure Monitor and Portable Air Scrubber, SHIELD WALL™ maintains negative or positive pressure differentials. It can also create anterooms for passing between spaces while preserving pressure.

Ask us about TWS Temporary Wall Systems, our rental service partner.

WHAT IS SHIELD WALL™ IDEAL FOR?

Contractors choose SHIELD WALL™ (CORE, CLASSIC & CLEAR) for quick, adaptable containment, minimizing drywall labour and startup time with easy connections. Reusable for long-term cost savings.

ATTRACTIVE

These sleek systems offer a professional look that adapts to any aesthetic, effectively concealing construction areas from occupied spaces better than traditional methods.

FAST

Contractors need efficient and simple containment solutions due to rising labour costs and skills shortages. A two-person crew can assemble 30 feet of linear walls in 15 to 30 minutes, saving time and money.

REUSABLE

Reducing waste by eliminating landfill disposal costs is an important consideration in today's environmentally conscientious decision-making.

EASY TO CLEAN

Crafted with smooth polycarbonate (Classic & Clear) and durable galvanized steel/aluminum (Core), these panels are easily cleaned and decontaminated, supporting infection control protocols.

ECONOMICAL

These walls can be used repeatedly, quickly offsetting the initial investment and becoming ROI positive after just a few uses. Additional components can be purchased on an as-needed and project-design basis.

DURABLE

Built with extruded aluminum frames and a choice of panel materials, walls are solid and secure, with upper and lower connection points and hardware options to meet varying architectural features in the work zone.

UNIVERSAL

Mix and match any SHIELD WALL™ components together, including other manufacturers' brands. Universal compatibility gives greater flexibility in design and installation.

ICRA STANDARDS

SHIELD WALL™ meets ICRA Class 5 standards, creating a reliable barrier to contain dust and airborne contaminants, safeguarding patient areas.

SHIELD WALL™

BY ABATEMENT TECHNOLOGIES®

ALL ABOUT DOORS

SHIELD WALL™ CORE, CLASSIC & CLEAR doors are available in multiple widths and three styles are offered: hinged, sliding, or double-hinged. All doors include an adjustable threshold and sweep. Also included are filler panels for over-the-door, allowing for flexible height adjustment to different ceiling heights up to 10' 3".

UNIVERSAL SLIDING DOORS

Allows for an easy transition between left and right-hand operation.

Requires a minimum 3' (42" door) or 4' panel (54" door) installed to the left or right, depending on orientation.

Perfect where space is limited, and swing doors may pose safety concerns.

Available in two widths: 42" wide set in a 48" panel or 54" wide set in a 60" panel, both are height adjustable up to 10' 3" with the included over-the-door kit.

Features a gravity driven self closing mechanism and a magnet stop that may be removed.

UNIVERSAL DOORS

Swing in or out, and can be hung left or right.

The 32" wide door is pre-hung in a 36" panel and the 44" wide door is set in a 48" panel.

Both doors are adjustable up to 10' 3" with the included over-the-door kit and door closer.

An electronic digital keypad may be purchased separately for hinged doors.

DOUBLE-HINGED DOORS

Double hinged doors are 68" wide and set in a 72" frame.

The double door assembly is 84" high but adjustable up to 10' 3" with the included over-the-door kit.

The primary door with door handle cut out is 44" wide and the secondary door is 24" wide.

The primary door latches into the secondary door via the latch bolt.

The secondary door is secured at the top and bottom with spring loaded pins.

Both doors can be hung to swing in or out.

SHIELD WALL™ CORNERS

The flexible hinged universal corner will change the wall path 90° (inward) and 270° (outward). When used as an inside corner it changes the path inwards towards the containment area and decreases the containment area. When used as an outside corner it changes the path outwards away from the containment area and increases the containment area. Hinged corners will add an additional 1" of length to one wall and 3" of length to the other.

The fixed inside corner changes the wall path 90°.

T-Connections create an intersection in a wall allowing you to T-off that wall 90° with another panel either outward or inward.

All Corners and T-Connections are height adjustable from 7' to 10' 3". 3' corner extensions are available for all of the four types above.

WALL SEALS & ADAPTORS

CORE, CLASSIC & CLEAR

Wall seals can be used to create a small extension to fill gaps between an existing wall and the SHIELD WALL™.

The drywall adaptor can be used to attach a section of drywall to the panel system to accommodate non-plumb walls or other protrusions such as handrails, pipes and large molding.

Fixed wall seals abut against walls with obstructions 0.5" or less such as thin molding.

The wall seal extension kit has both a left and right side extension that can extend up to 3.25", 9" in total width.

We also manufacture an adaptor kit that includes a left and right adaptor to connect to other system panels.

HARDWARE, ACCESSORIES & CONNECTORS

Our new drop-in connection system has reduced the amount of hardware needed and has made installation quick and easy.

The transport cart fits through standard doors and has four swivel wheels for easy handling. Panels are secured to the cart with ratchet straps. The maximum load is 670 lbs of any combination of panels and doors. Great for storage between projects. (The transport cart must be assembled).

A window kit can be installed on a CLASSIC panel or door before or after the wall is built. It can be installed on any 2', 3' or 4' panel or door in the upper panel area.

Two kits are available:

- 16.5" x 22.5" window in a 20.5" x 26.5" frame
- 22" x 28" window set in a 26" x 32.5" frame.

Pre-installed exhaust port frames are available for any 2' CLASSIC, CLEAR or CORE panel that includes a blank security plate. Drop in exhaust plates are available with 8", 10" and 12" collars (purchased separately).

An exhaust frame kit can be purchased separately along with the drop in exhaust plate with the desired size of port collar. This kit is easy to install (for CLASSIC and CLEAR materials only).

3 EXCEPTIONAL MOBILE CONTAINMENT CARTS

FOR CSA, CDC AND ICRA COMPLIANCE

Portable containment carts for easy, safe access, above ceilings.

INCLUDED EQUIPMENT:
AG3000, Caddy Cart, Portable Air Scrubber, HEPA Vacuum, & Filters

Abatement Technologies® Branded Chemical Products

We have worked with many suppliers to create our own exclusive versions of standard Restoration and Asbestos Abatement products. We specify everything about our own private label products – what goes in it, how it's packaged and what the label looks like. Our many years of experience with contractors has allowed us to create our own lines of industry-leading chemicals, such as lockdown encapsulants, degreasers and soy mastic removers that rival leading name brands for performance and quality. By creating our own Abatement Technologies® branded products we can pass on substantial savings to our customers. Speak with one of our highly trained representatives who can assist you in making the best product selections customized to the needs of your project.

FOGGERS and SPRAYERS

PRORESTORE ELECTRO-GEN™

PART NO: FS-UM0604

- The industry's most durable electric thermal fogger
- Converts 1 oz of Thermo55® into a 2,000 cubic foot deodorizing cloud in 30 seconds
- Can be used as an electrical sprayer
- Solvent-based products recommended

DELUXE SPRAYER

PART NO: K9-2600-08

- Converts anti-microbials and/or deodorisers into an aerosol fog
- 36" Hose Included
- Adjustable Flow Nozzle 0-.115 GPM, 5-50 Microns
- 1-gallon plastic tank

48 OZ INDUSTRIAL VITON SPRAY

PART NO: SP1046

- 48 oz translucent poly bottle
- Compatible with most industrial chemicals
- Adjustable cone nozzle and shut-off

2 GAL SPRAYER

PART NO: SP20020

- 2 GAL funnel-top, translucent tank for easy filling and cleaning
- Includes a 12" wand, 34" reinforced hose, adjustable nozzle and comfortable spray handle

ELECTRIC FOAM UNIT FOR PRE-MIX PRODUCTS

PART NO: SP-FI-JR

- Powered by 120 VAC Electricity
- On-board 1.5 hp air compressor
- 25ft. (7.6 m) coiled twin-line tubing- Optional extension to 100 ft. (30.4 m)
- 65" fan tip for increased coverage
- Compact size for portability
- Santoprene, Viton, or Kalrez pump seals for chemical compatibility

FOAM UNIT 5 GAL PUMP UP WHITE TANK, 1/CASE

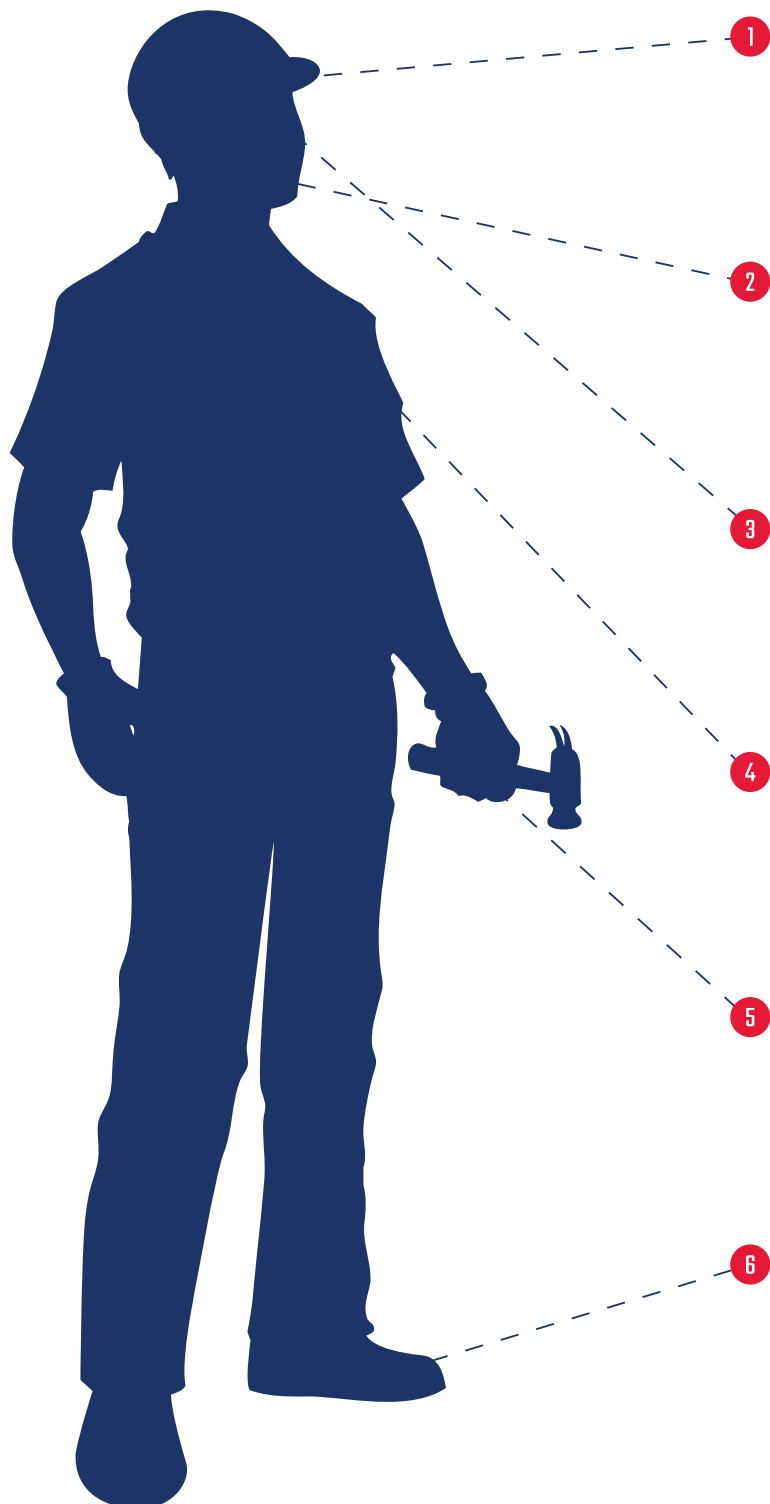

PART NO: FI-5L

- Compact unit with manual pump
- Maximum portability for small jobs and spot cleaning
- Comfortable grip handle with trigger for quick on/off control
- Ability to switch between short and long wand assembly

DUCT-PRO[®] EQUIPMENT FOR PROFESSIONALS

DUCT CLEANING

Breaking down the barriers to entry. Source removal Duct Cleaning is an effective alternative to expensive duct cleaning trucks. Originated by Abatement Technologies in the 1980's source removal duct cleaning allows a contractor to easily enter or scale-up in duct cleaning. At a fraction of the cost, our source removal duct cleaning packages allow restoration contractors to easily expand their capabilities without the risk of large financial commitment

To make sure you can select the right package for your needs we have developed a 3 Step Process to customize everything from the vacuum to the compressor, agitation devices, and accessories. This gives you the ultimate flexibility while still taking advantage of package savings. It's as easy as 123.

1 PICK YOUR VACUUM

You pick a Portable Power Vacuum from our selection of models that range from a basic economy entry-level vacuum up to our most powerful high-performance unit. Source removal is versatile. You are able to clean residential and commercial properties because you can take the vacuum to the duct instead of running long lengths of hose from a vehicle. You get the same static suction in the basement, in the attic, or on the 50th floor.

2 PICK YOUR AIR COMPRESSOR PACKAGE

Your choice of compressor will be determined by the air power needed to drive the compressed air tools that loosen dirt and debris from inside the ductwork systems.

3 PICK YOUR TOOLS AND ACCESSORIES

We stock our own branded lines of power rotary brush and power whip agitation systems to remove and clean inside ducts. Additionally, we offer a complete line of duct cleaning essentials such as grill mask, hole cutters, caps, plugs, screws and chemicals for your professional duct cleaning enterprise.

PACKAGE ORDER LIST

EXAMPLE PACKAGE

Our knowledgeable sales team is available to help you pick the right products and to assemble a custom package for your business's needs.

Contact our Duct Cleaning Specialists with all of your questions today and don't forget to ask about how we can put you in touch with equipment financing through one of our Leasing Partners!

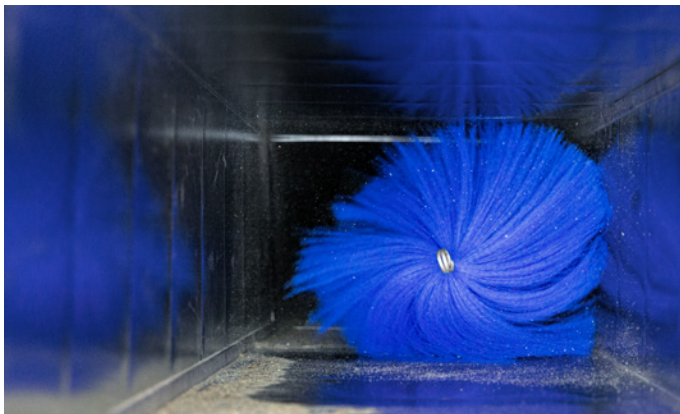

K3-1020 POWER WHIP SYSTEM

The Power Whip is a 20 foot long, bi-directional drive cable powered by a standard 3/8" or 1/2" electric drill (not included). Whip straps attached to the end of the Power Whip provide aggressive agitation inside the duct system. Special duct brushes can be substituted for the whip straps to provide additional agitation options.

C5000 POWER ROD SYSTEM

The unique Power Rod System is a versatile agitation device and compressed air tool used to remove caked-on dirt and debris from air duct systems. The Power Rod System blasts compressed air through flexible rods to create a "whipping" action that scrubs every square inch of the ductwork in a variety of duct types and configurations.

K3-2024 POWER BRUSH SYSTEM

The Power Brush provides source removal duct cleaners with an essential tool for dislodging caked-on debris from inside duct surfaces. This efficient and powerful unit combines forward and reverse brush agitation with compressed air in a powder-coated, galvanized steel cabinet.

K3-5000 DRYER VENT KIT

A perfect add-on service for duct cleaners. The dryer vent cleaning kit includes a system of flexible nylon rods that are powered by a standard electric drill. This is an efficient tool for residential and commercial jobs.

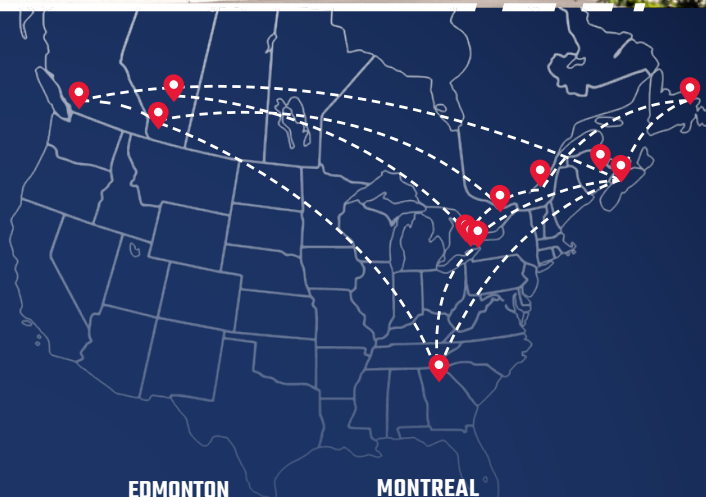

For more than 40 years
companies around
the world have
relied on Abatement
Technologies for HEPA
filtration systems
and other indoor
air quality products
with industry-leading
quality, performance
and reliability.

Our experienced and professional staff are
dedicated to providing exceptional customer
service and technical support.

Knowledgeable sales representatives can help
you select the right equipment for your
specific application.
