## **Abatement Technologies Announces Strategic Partnership with Temporary Wall Systems**

*Temporary Wall Systems will leverage Abatement's robust containment wall systems to provide franchise owners with modern, clean, and secure rental solutions for construction projects*

**ATLANTA, GA** – Jan. 24, 2023 – [Abatement Technologies](https://www.abatement.ca), a manufacturer of specialized construction containment products designed to help protect those in and around construction in occupied spaces, announces a strategic partnership with Temporary Wall Systems (TWS), the first full-service provider of rentable temporary wall containment systems for commercial renovation. This strategic partnership will position Abatement Technologies as the preferred vendor of modular containment wall systems for TWS across all locations.

Until recently, contractors would use drywall when they needed to block off a construction site from the surrounding environment. However, this process wastes materials, money, and time. Reusable, lightweight, and easy-to-assemble modular containment walls are now solving this problem. Abatement Technologies is a leading manufacturer of these walls, and TWS is helping meet the rising demand for modular containment walls through a new business model of renting walls to contractors and facilities.

Through its parent company, HomeFront Brands, TWS has been well aware of Abatement Technologies' products and their reputation in the industry. For the past 20 years, Abatement Technologies has been dedicated to the construction and restoration industry and has spent the past six years focused on developing superior modular containment wall systems. This long history of quality led TWS to select Abatement Technologies as its preferred partner.

Andrew Harber, CEO, Abatement Technologies, said, "We're honored to partner with Temporary Wall Systems as its preferred provider of modular containment wall systems. This partnership stems from our confidence in the success of HomeFront Brands and its track record of launching successful franchises. With the combination of HomeFront Brands' extensive experience growing businesses and the massive market for containment walls, Temporary Wall Systems is positioned for rapid growth, and we're excited to be on the journey with them."

Jeff Dudan, Chairman and CEO, HomeFront Brands, added, “My business relationship with Abatement Technologies spans over two decades. They are not only a proven industry leader, but their leadership and team members have demonstrated a commitment to business partnership that aligns with our values. We are very excited to enter this next chapter together.”

The key product in this partnership is Abatement’s SHIELD WALL™ Core panels, a flagship modular containment wall designed for superior sound attenuation. Designed for quick and easy assembly, TWS technicians will be able to install these walls in a variety of industry settings. SHIELD WALL™ is easy to clean, and designed to work with portable air scrubbers, making it ideal for critical care environments. Furthermore, its sound attenuating properties and attractive finish options help it perfectly hide construction in restaurants, offices, labs, and everything in between.
